THE JOURNEY WITHIN: EXPLORING THE INSIDE OF THINGS

A journey that began by looking at our native land with new eyes, seemingly suspended in a timeless dimension and untouched by modernity, but which appears to the patient observer as being authentic and of excellent craftsmanship, handed down from one generation to the next, the highest expression of Italian know-how.

A journey, directed by Massimo Castagna, also looking within ourselves, a moment of reflection on what we would like to have in our home and on contemporary living. A project that continues today, keeping with its initial spirit, growing richer with every step, evolving with each experience, offering new visions and new inspirations; a path passing through places and times, reinterpreting the present.

We conceive and create products in which design and the expressive force of natural materials become an organic whole, a combination of space and nature.

Objects that are much more than a piece of furniture: a presence that ages slowly, together with us, day after day, developing that unique patina that only time can create.

COLLECTION DESIGNED AND COORDINATED
BY MASSIMO CASTAGNA

We produce unique masterpieces, each with a soul that cherishes the journey leading to its creation.

A journey in search of the difficult balance between the analysis of the mind and the reasons of the heart, inspired by our personal sense of beauty and passion for intimate and familiar things.

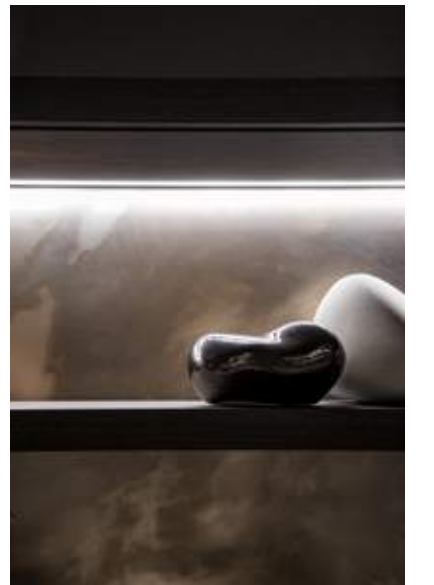

It is precisely for this reason that people are at the center of our thoughts and our interest: for their ways of living, for their desires and the evolution brought about by changing times and customs, factors that influence our needs and consequently what and how we should approach our projects.

Working natural materials by hand, we know that each piece is unique and that every product will be different from the next.

chapter

1

The Henge world is incredibly rich in ideas and materials that define a personal mood: woods with deep colors and grain, stones as works of art, soft, smooth and supple fabrics and leather, metals burnished and aged by hand, along with sophisticated materials such as steel fabrics, finished and decorated Etna lava stone, swamp oak, Titanium stone. You cannot fool nature, or copy the beauty that it creates, just as you cannot imitate the sensations that only natural materials can convey.

Matter is rediscovered in its essence and in the fascination of its imperfection.

Our approach to projects knows no limits in regard to materials, technology and form.

BEING EXCEEDS THE BOUNDARIES OF DIMENSIONS

Every Henge piece is made exclusively by one of our craftsmen, from production to finishing: this guarantees that every product has its own maximum expressiveness, upholding the integrity of the brand. This is the potential of a kind of beauty that transcends the limits of lines.

Matter for matter, like art for art, is transformed by the hands of those who interpret and translate it into objects that define our relationship with life.

It is in this relationship between creator and creations that Henge's philosophy finds its roots: in the exchange of emotions between surfaces and in unique tactile sensations and experiences.

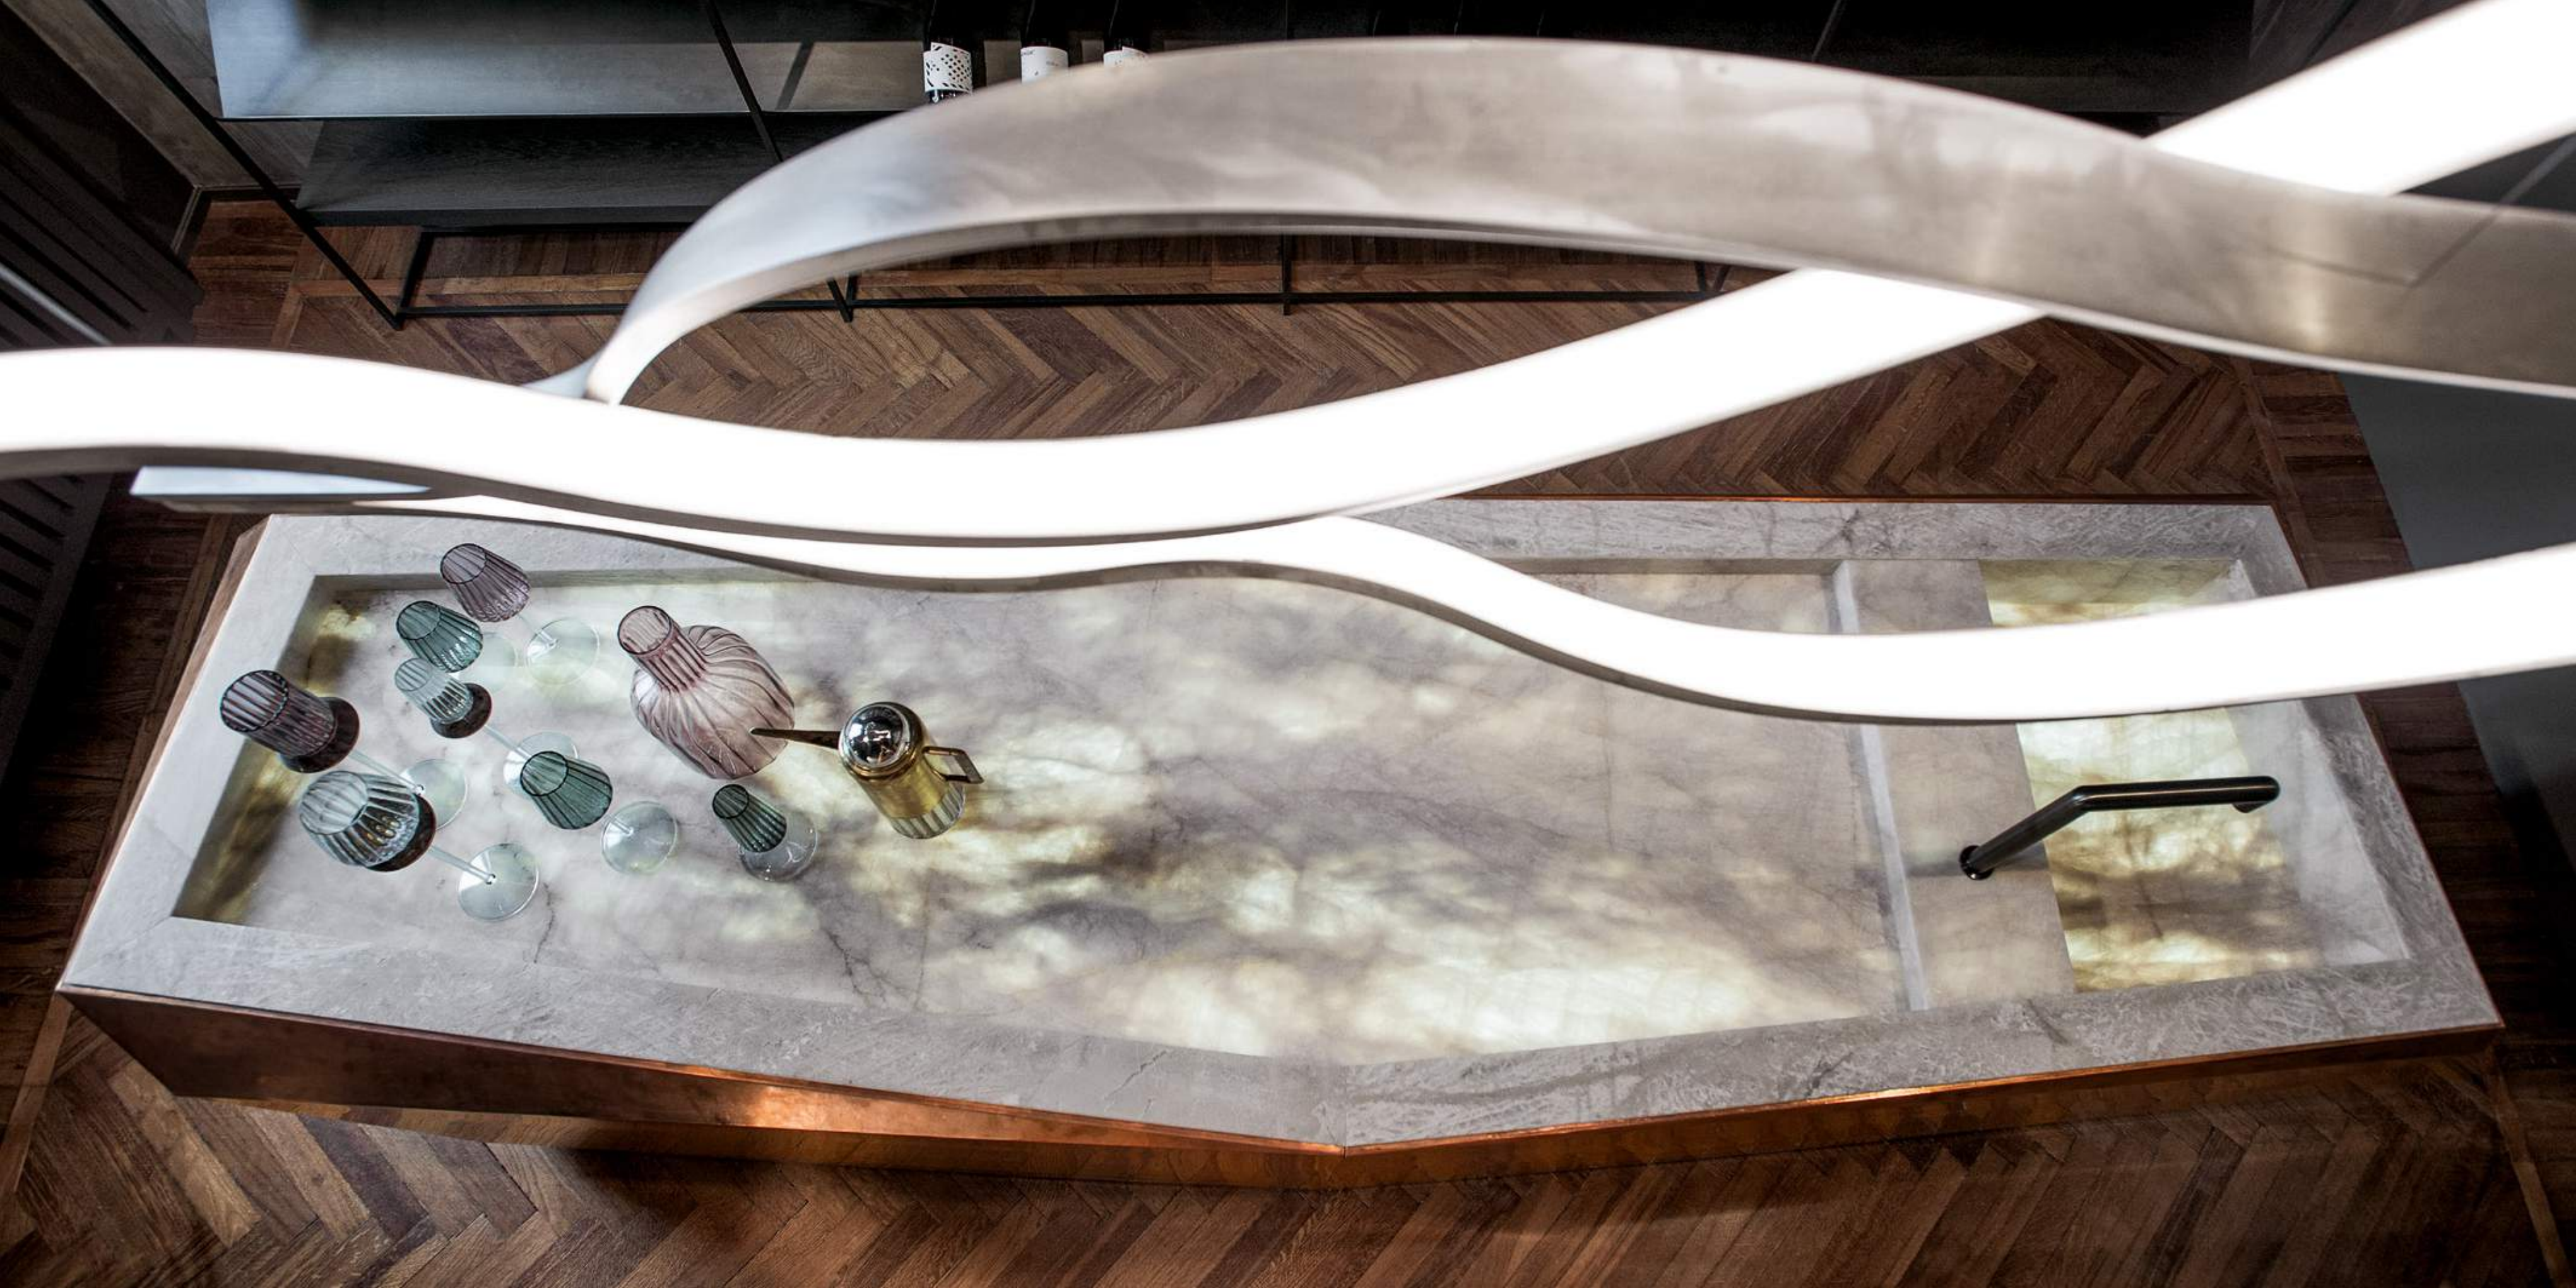

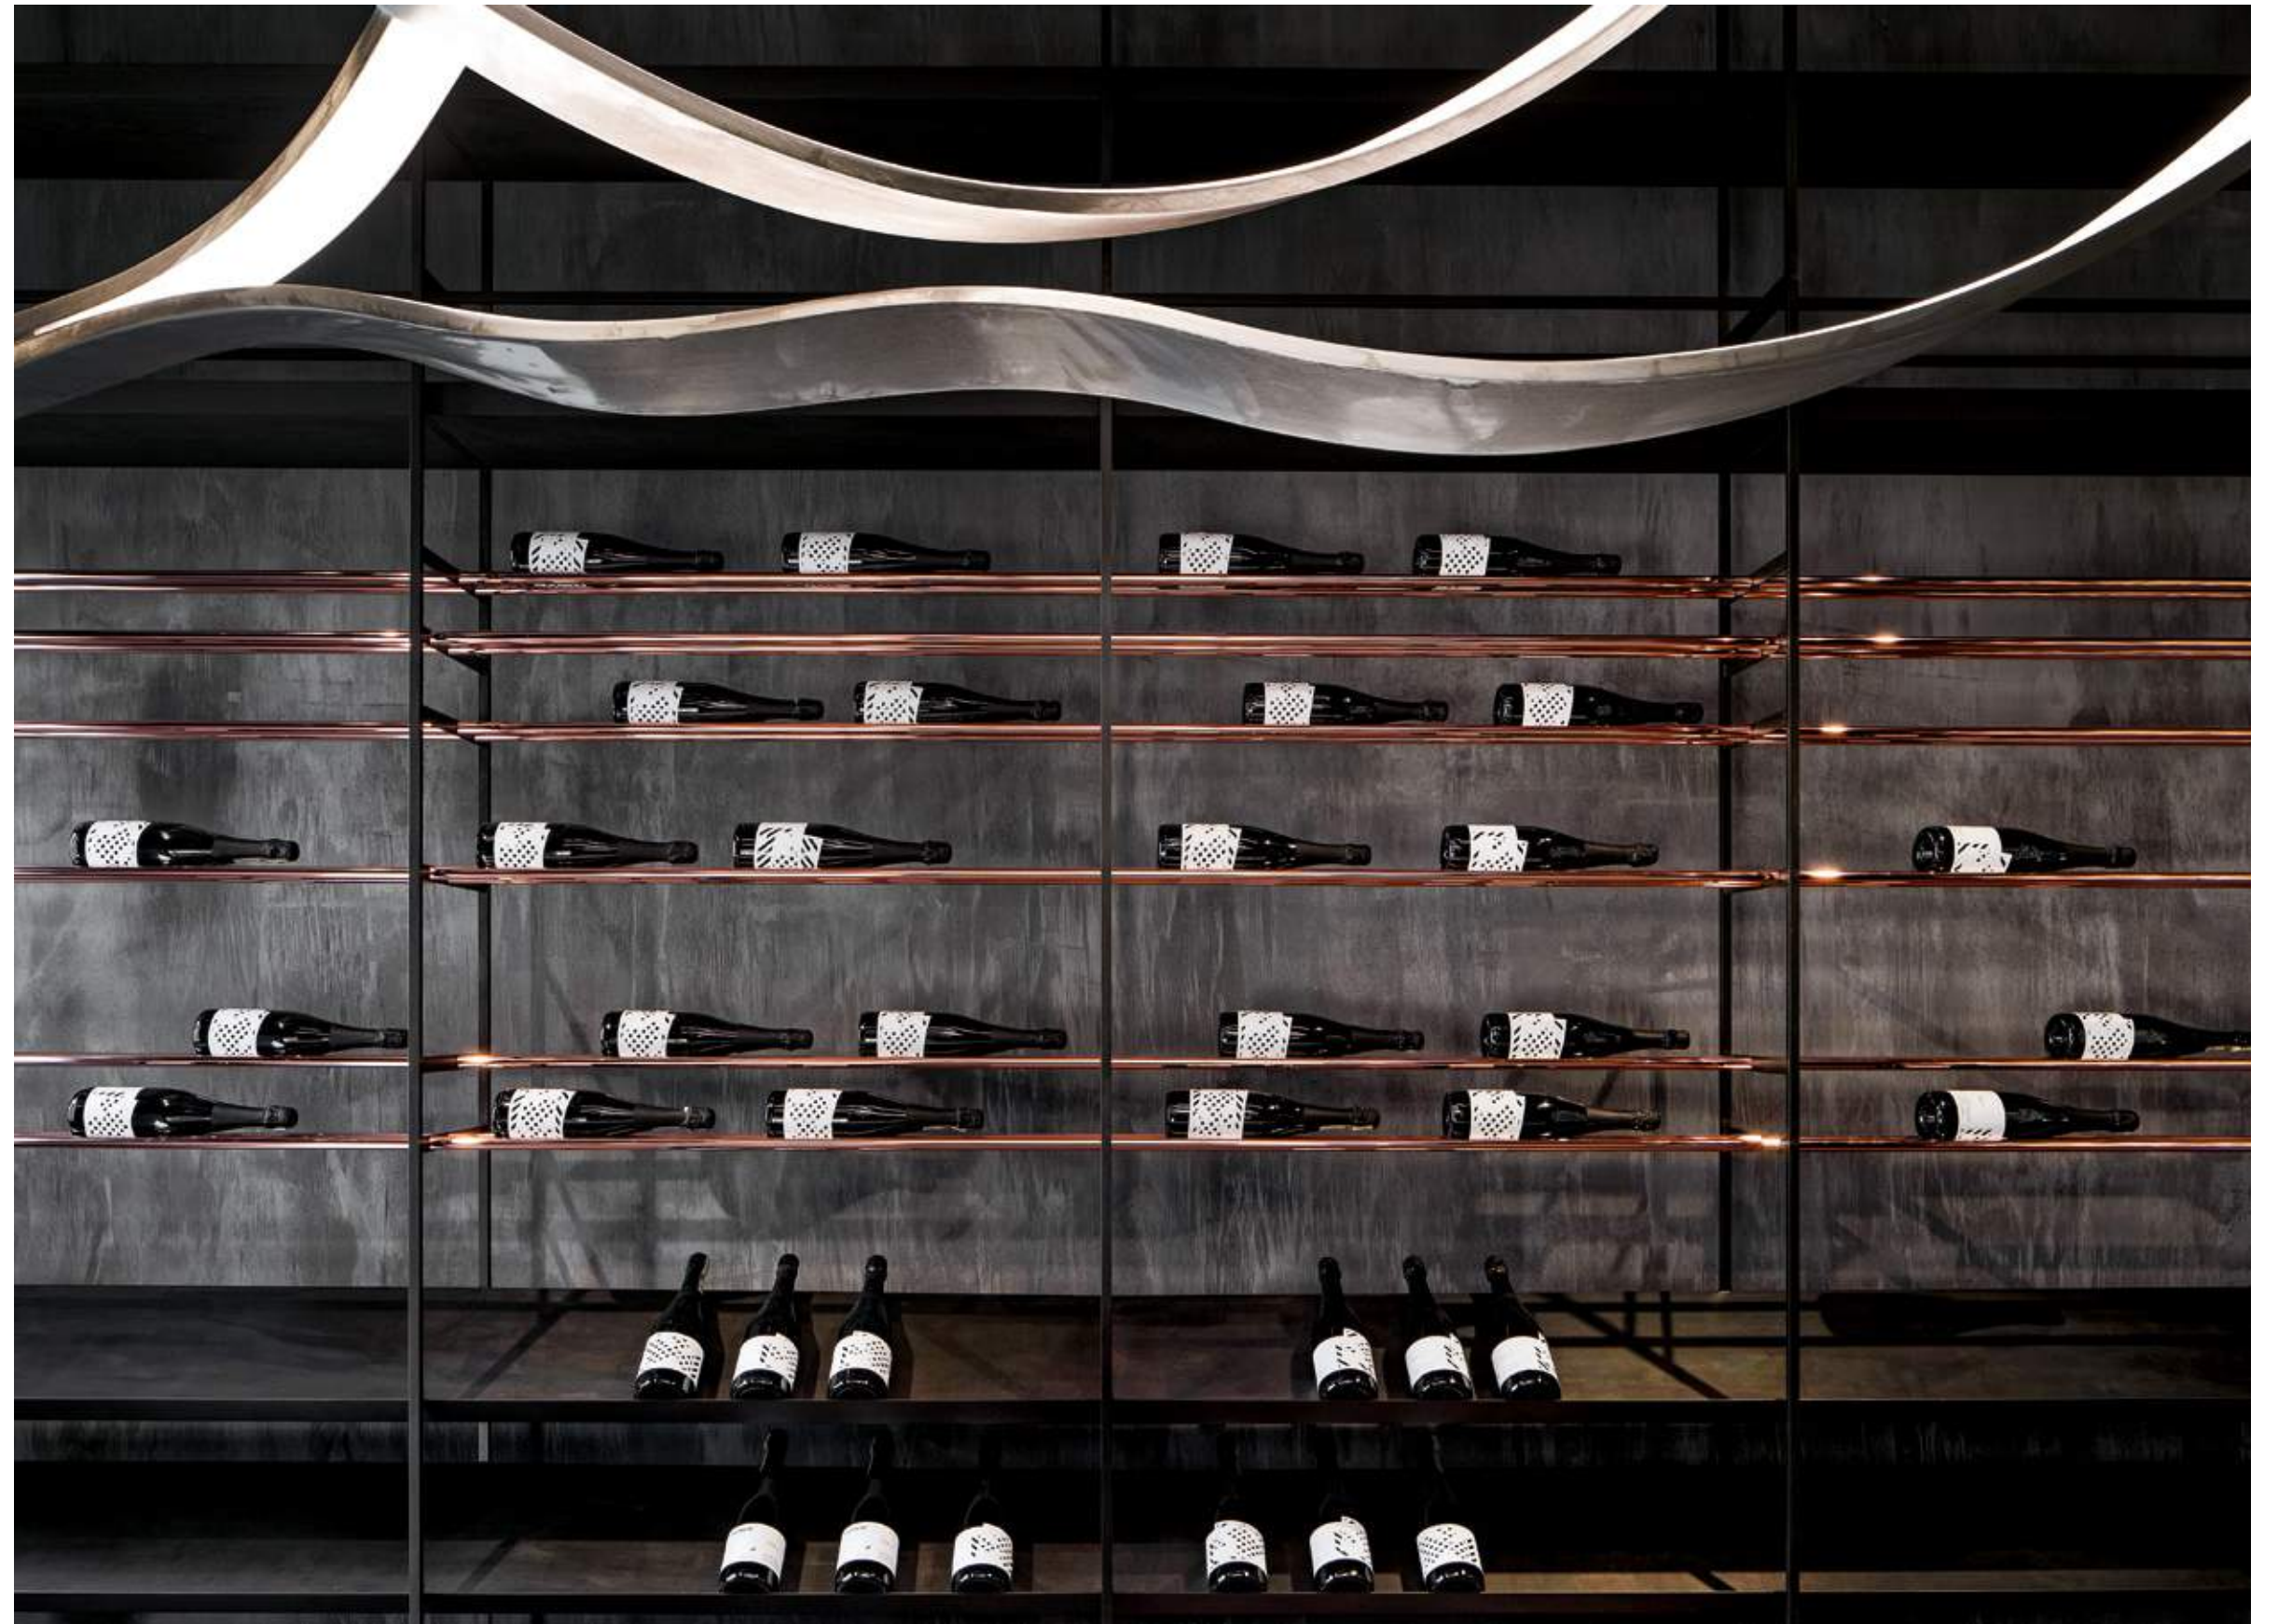

Different materials touch each other in seamless harmony.

Our DNA resists
the dynamics of
production cycles
and conformity to
any one style.

The finished products open up a world of discovery that speaks not only to each product's design but also to the space they come to inhabit.

THE TIMELESS PATINA OF A CHERISHED RAW BEAUTY

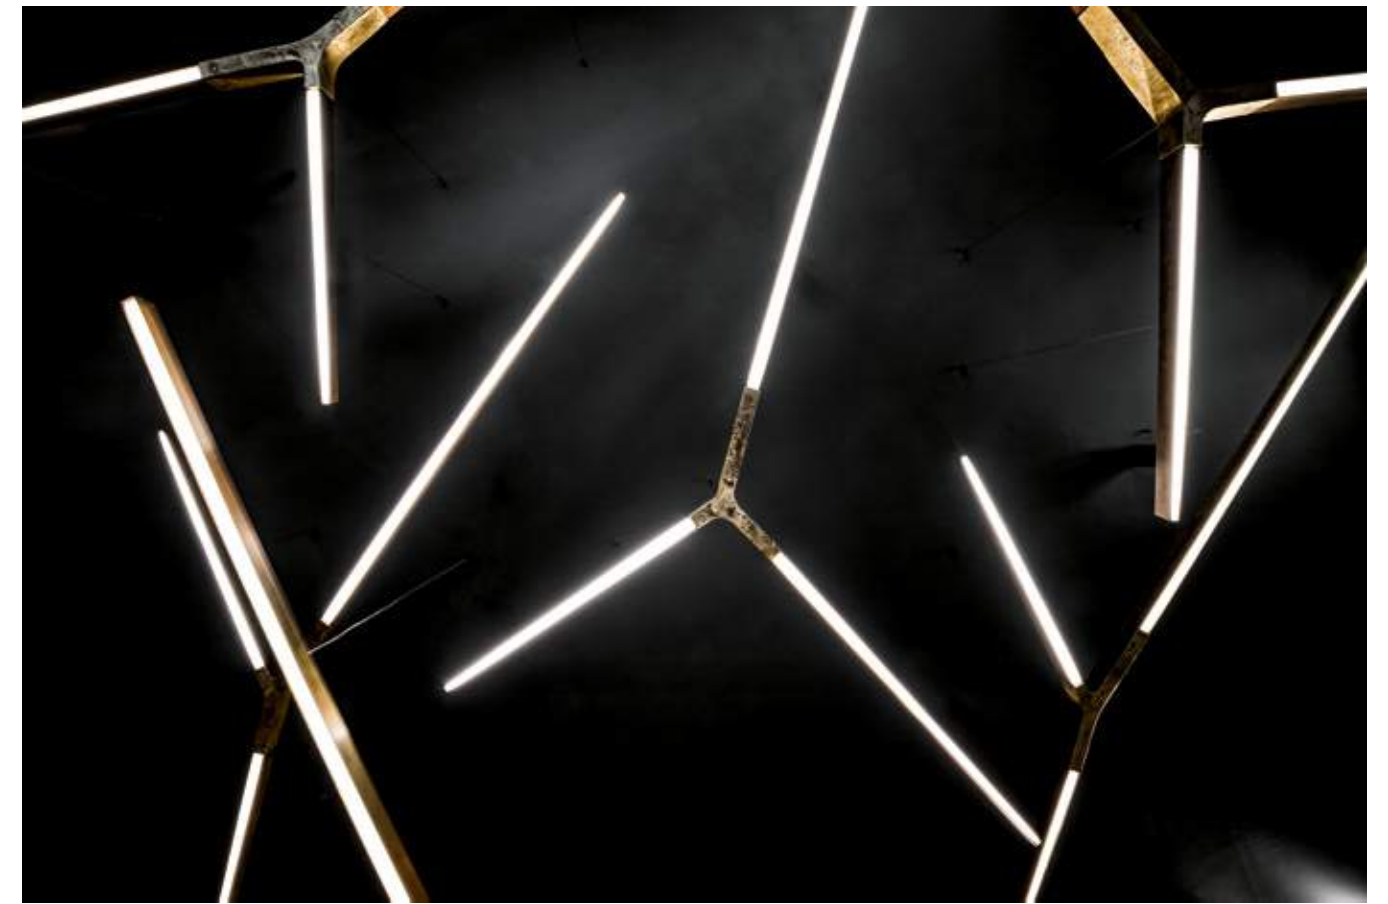

Since its inception, Henge's guiding philosophy lies in the rejection of industrial principles. Instead, the Henge design concept connects each client with an experience where a simple piece of furniture becomes a travel companion. The most brilliant minds and hands imagine, design and finish these creations that become part of someone's life: a magnificent presence that embraces our uniqueness, making each of us special. Henge's craftsmen create pieces with a pure soul that, in a unique way, communicate and get in touch with the world around it.

Life is a craving
for contrasts that
generate evocative
antitheses that we try
to understand.

By stepping outside the box, creative thinking can begin to engage in lifestyle scenarios, centered around people and their desires.

chapter

2

LEARNING FROM NATURE: A JOURNEY INSIDE THE EXPERIENCE OF DESIGN AND LIFE

Nature speaks in many voices, from its soft murmurs to its disruptive songs. It is a tireless soul that changes with each encounter; it revolutionizes its existence without losing itself, emanating its magnificent power even in the most delicate gestures.

Henge is the essence of listening to this incessant orchestra - a stone that has passed through time and has witnessed its symphonies, deeply touched by a nature that is ready to reveal itself to those who can hear beyond the silences.

The best Italian artisan work extrapolates the images suggested by nature; it sculpts the surfaces as if the object already lives in the material, eagerly waiting to exist.

Man is part of this irrepressible flow of ideas, of force and of evolution, and knows its language. Translating it is an art for the few who know how to immerse themselves in the world's soul and understand its secrets. Henge's history stems from this deep bond: from the unrestrained inspiration from nature that makes imperfection and inimitability its greatest beauty and from the innate ability of man to imagine.

“You see a block, think about the image: the image is inside, you just need to undress it.” — Michelangelo Buonarroti

AN IDEA, A PROJECT: FOREST FUSION

The forest contains the poetry of elements united in symbiosis. It is an intertwining of lives, lights and shadows that connect to such a point that they can only be described as a whole. Hierarchies are lost in a fusion of souls and uniqueness. They touch and hold one another, becoming something that is neither one nor the other but retains their traces. The forest, with its dense plot of stories and emotions, writes an ancient tale that inspires Henge's creation of a technique that sews together these unique souls: Forest Fusion. In their union, these fragments of matter are the full expression of their past, made by the hands that impart centuries of artisan knowledge in their fusion.

Each unique piece is selected, cut and placed in a sartorial painting that bears the signature of the best Italian craftsmanship.

Processing is the instrument through which this natural ensemble finds form and voice, in an intimate story that speaks to contact with the fingers. Forest Fusion's tactile experience is to close one's eyes and feel the forest's breath, its innate depth and perfect balance. This new technique merges with Henge's philosophy of creating a resonance between kindred spirits that become companions on a journey inside material and life.

Every morning one of our craftsmen offers his hands and his art to make each Henge product unique. We create your everyday experience.

Spaces, places and
tactile experiences to
make it unforgettable:
a journey requires
nothing more
than that.

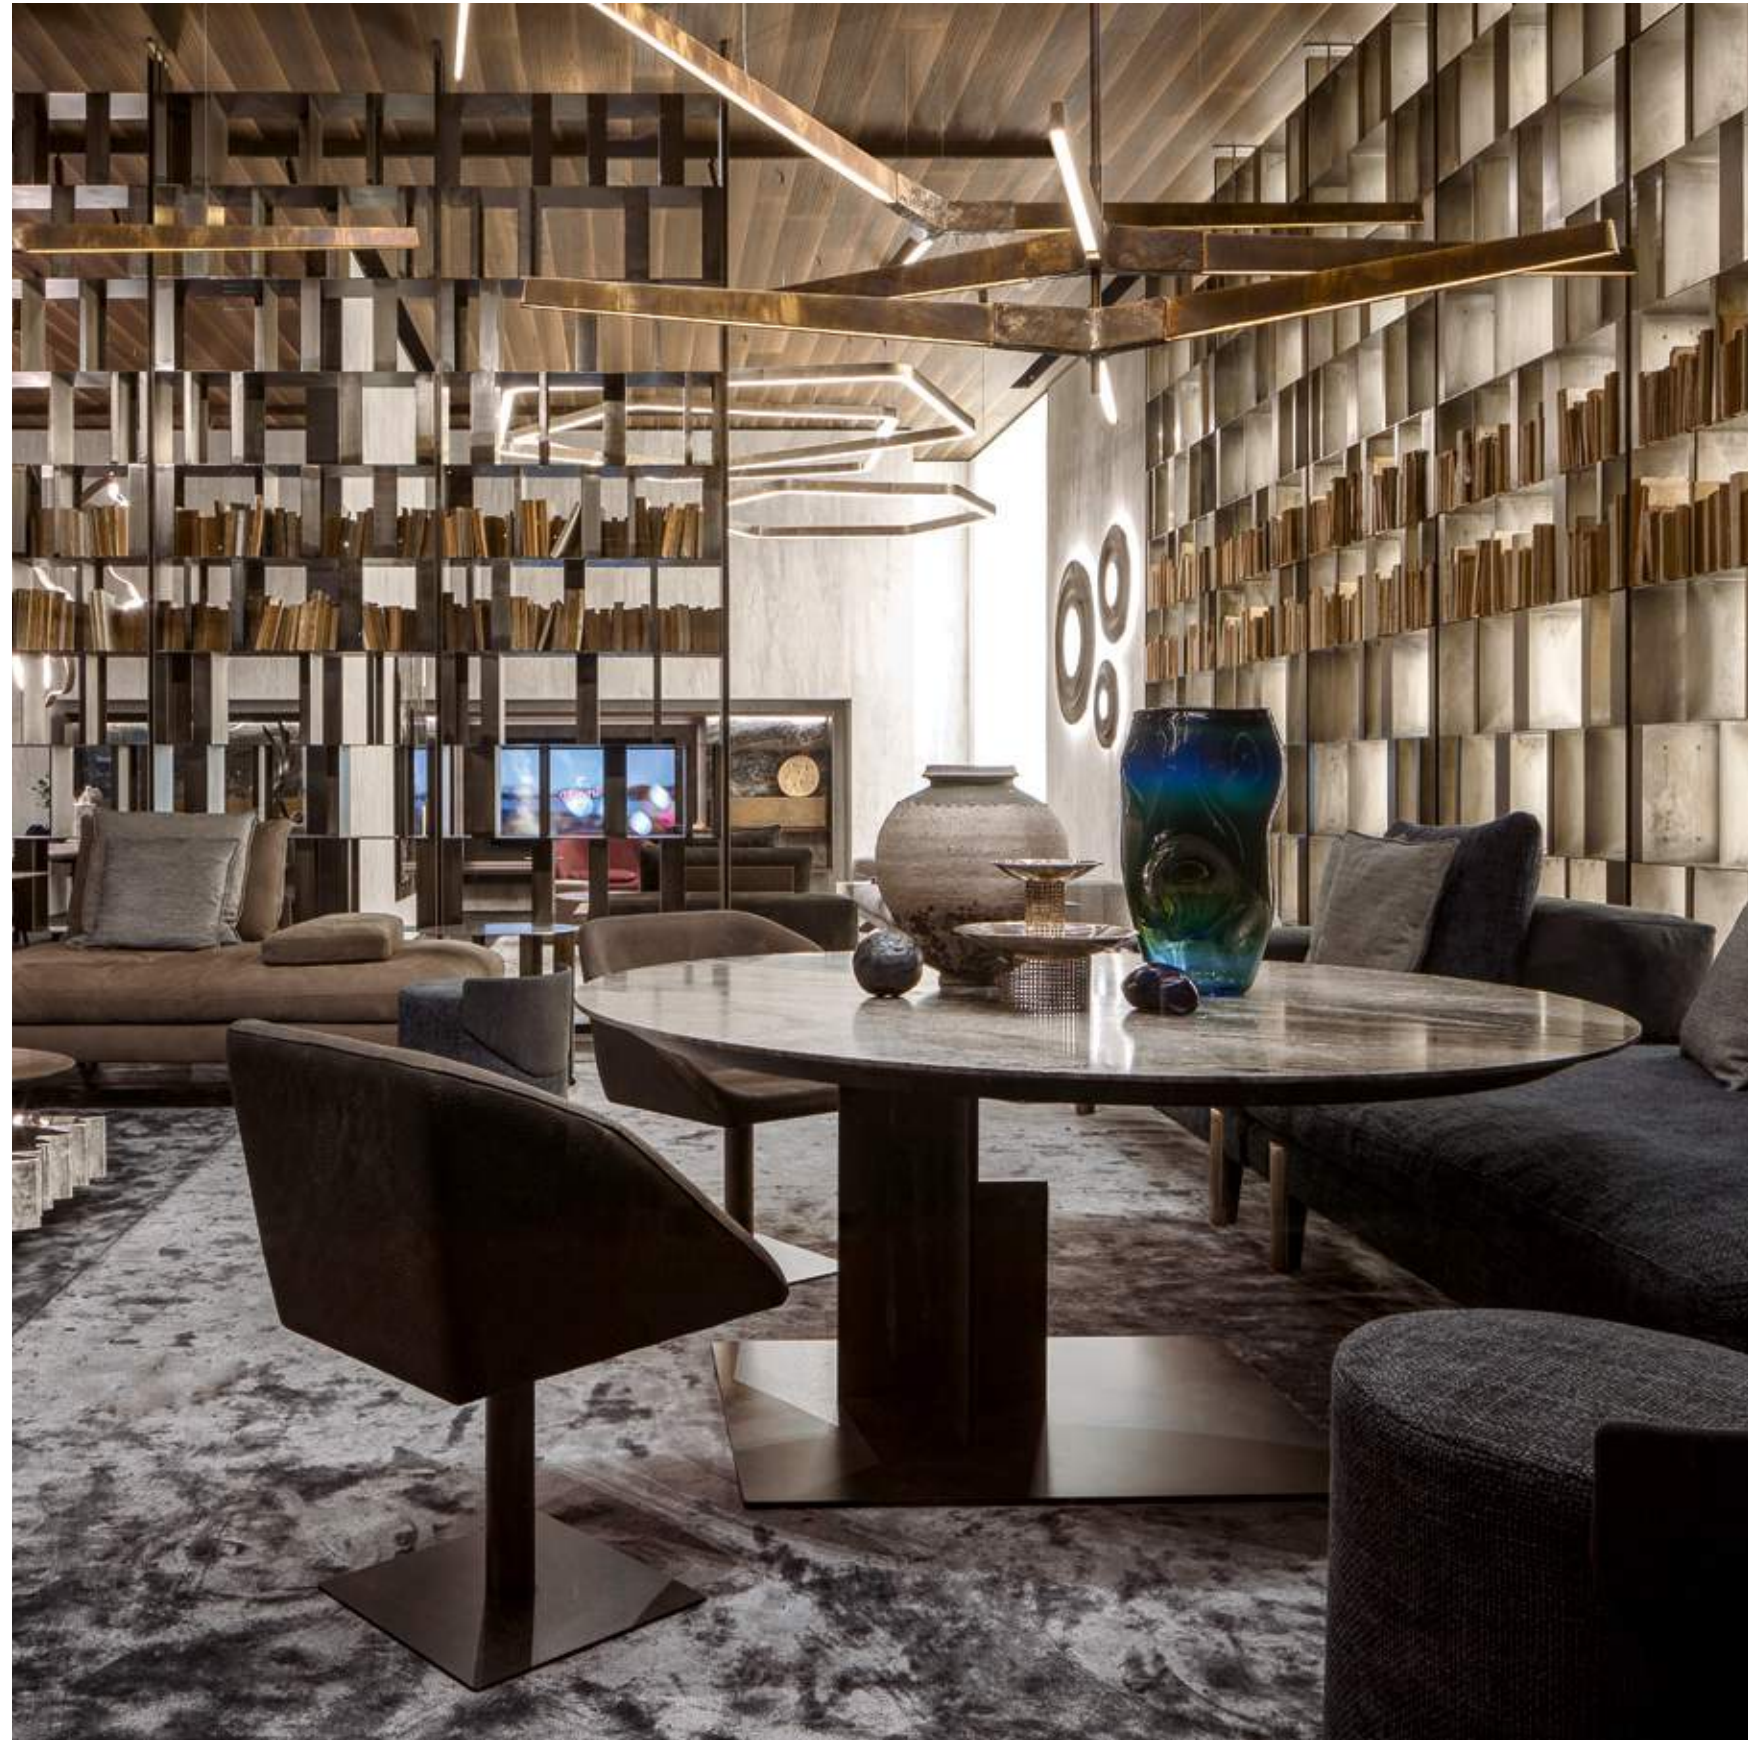

Experimentation
creates a sort of
intellectual tension
that moves us and
binds us to every
lived experience.

chapter

3

There is a flow in the universe that travels through matter. It is a pulsating energy that crosses the skies, the earth and its bodies. It flows in the veins of the leaves, in the marble of the quarries, in electric cables, in man's throbbing arteries, in his synapses. It is an impulse that goes from the origin of everything, reaching its most remote corners, of atom in atom, across those imperceptible bonds that form the network of existence. We live through connections. We live through connections that exist independently of us. We are actors and spectators, messengers, admirers, critics, philosophers, dancers. Every man is a part of everything and connected to the whole.

A DANCE OF LIVING BODIES

That is how we define the experience - the feeling of being able to touch an intimate entity hidden in matter, of recognizing it as our own, of understanding its secrets, in infinite bundles of energy that run through us and in all directions.

It is as if the smallest shape of the universe can't be reduced to a single point. Instead, it is what lies between that tiny point and the others and the connections that exist between them.

We dance a dance of bodies to the rhythm of the mystery of life, connected to a single soul for whom we try to find a name. A vibration that resounds among the knots of the wood, between the nuances of a stone, between the reflections of a metal and the breath of one's skin.

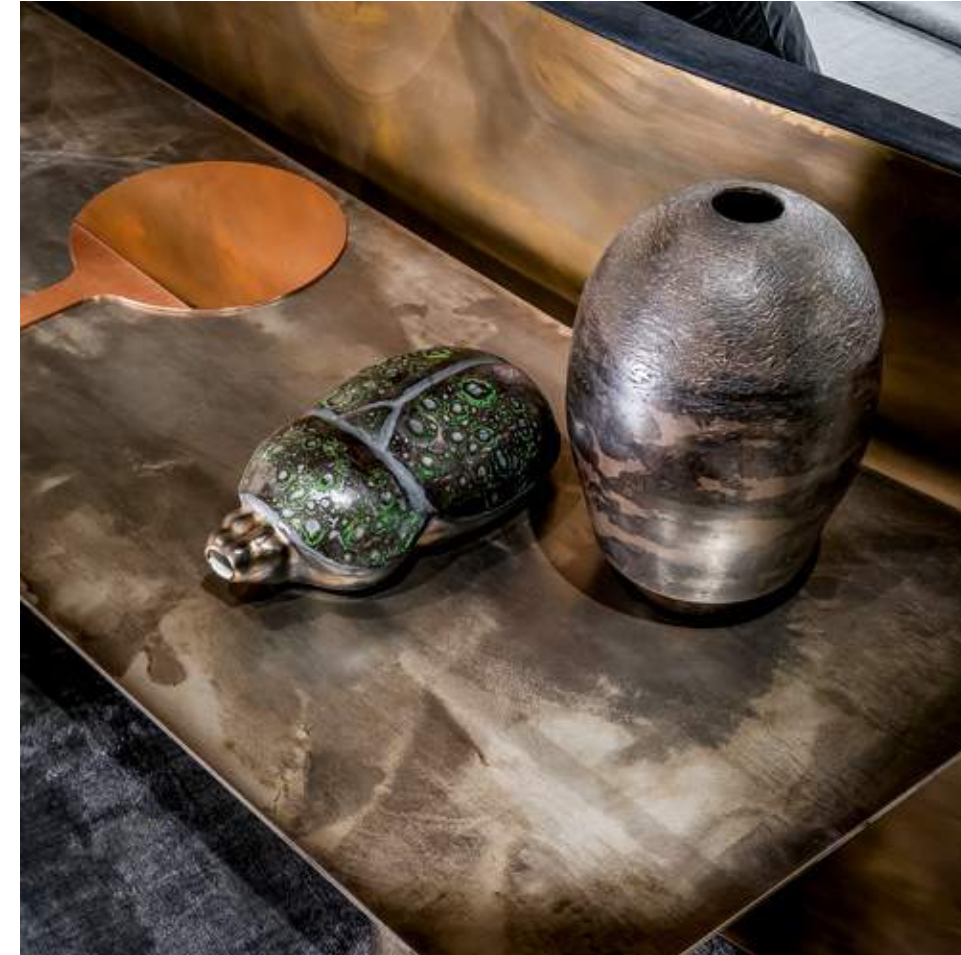

“I learned that the world has a soul, and that whoever understands that soul can also understand the language of things.” — Paulo Coelho

The connection lives in the law of change and transcends it. It evolves without detaching itself from the parts; some are close enough to touch one another, while others are so far apart that they are forgotten.

Veins. Roots.
Galaxies.

The tiger's stripes.
Synapses. Hands.

Roads. Feelings.
The weave
of a shirt.

Experiences.

"It happens that the kindships of the soul they do not reach the gestures and the words,
but they remain effused like a magnetism." — Eugenio Montale

Henge pieces are fragments of that soul that binds them together, recomposing everything into a puzzle of living bodies made of different materials.

Through a single
encounter, one
can understand
everything.

Seating system

Design
Massimo Castagna

STRUCTURE
Solid wood with suspension provided by elastic webbing.

PADDING
Polyurethane foam, covered with 100% goose down, internal cover in 100% white cotton lining. Seat cushion with high resilience variable density polyurethane foam covered with 100% quilted goose down. Internal cover in 100% white cotton. Back cushions padded with high density foam chips and polyester fiber. Internal cover 100% white cotton.

BASE
Steel hand burnished black.

FINISHES OF COVER AND PIPING
Fabric or leather from our samples catalogue. Leather version cover not removable.

DIMENSIONS
cm 110x85h
Seat cm 40h

NB Right/Rh and Left/Lh indicate the position of the armrest when facing the piece of furniture.

STRUTTURA
Legno listellare con molleggio tramite cinghiatura elastica.

IMBOTTITURA
In poliuretano espanso con densità variabile ricoperto con 100% piuma d'oca Bianca. Fodera 100% cotone spigato anti piuma bianco. Cuscino seduta in poliuretano espanso a densità variabile rivestito con 100% piuma d'oca Bianca. Fodera in 100% cotone spigato anti piuma bianco. Cuscino schienale con fibra di poliuretano espanso ad alta densità. Fodera in 100% cotone bianco.

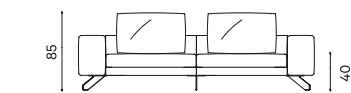

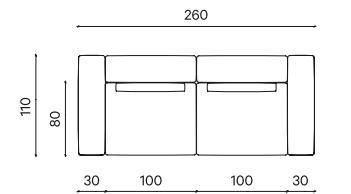

BASE
In acciaio brunito nero.

FINITURE DI RIVESTIMENTO E BORDO
Tessuto e pelle nelle finiture a catalogo. Versione in pelle non sfoderabile.

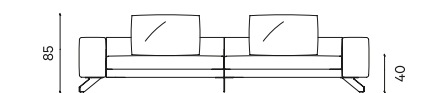

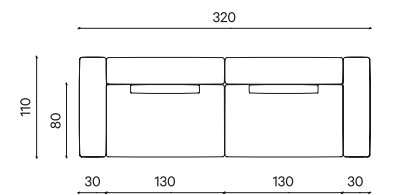

DIMENSIONI
cm 110x85h
